## The mobile all-in-one solution

Today in a conference hall, tomorrow in a lecture room and in between a welcoming speech at the lobby, a PowerPoint presentation in the executive's office or a cinema show in a classroom: Just simply move the multi-media-mobile in front of a projection screen and start: Below you will find just a few possibilities for its usage:

### Multimedia presentation

Two switchable VGA ports for laptop or PC are available. A handy folding table, which can be mounted at the left or the right side, offers adequate storage place for your notebook. A wireless microphone supports the lecturer and offers optimum mobility throughout the entire hall.

### Video playback

Film start! The installed DVD and video player give the possibility to show VHS videos and DVDs at any time. And thanks to the integrated audio system your listeners can finally enjoy all tracks in high fidelity.

### Podium discussions

Your "ITEC multi media rack" includes a digitally controlled microphone mixer: up to 3 swan neck microphones (optional accessory) can be attached to the ITEC multi-media-mobile. Control of these microphones is carried out automatically and is voice-operated (there is a "sound engineer" on small scale integrated).

### Lectern

Just position the swan neck microphone and the speaker's desk is ready. The integrated audio system provides perfect sound. Complicated cable routing and the haulage of heavy boxes are no longer required.

## Central control panel

Simple operation allows even non-professionals to handle communication via a mobile remote control unit. All media servers, like video- and the DVD player, the PC and the Video camera, the entire sound system and the powerful data projector are operated with a mobile remote control unit and a touch screen. The operation is reduced to the most important and most often used functions – it is well-arranged and self-explanatory.

Remote control unit in charging point

Receiver

DVD Player / Video Recorder

Multimedia controller with connector panel and power amplifier

Drawer for accessories

Lockable roller door

Projector

Carrying handle

Rolls

**Security:**  
Lockable roller door

**Convenient:**  
Folding table for your laptop

**Rolling transport:**  
From room to room

**Portable:**  
Stairs are no barrier

Widths: 540 mm without folding table  
595 mm with folding table  
1000 mm with expandet table

Height: 1050 mm (incl. wheels)

Depth: 525 mm

### Base configuration

LCD projector  
Amplifier with digital sound processor  
Integrated high duty speaker system  
DVD player (also for CD and MP3)  
VHS video player  
Audio / video switch  
Remote control unit with touch screen  
1 VGA cable  
Connector panel ( Connections for: 3x micro, 2 x VGA, external video, line in , line out, 230 V power socket, main switch)

### Options

#### Wireless microphones

We recommend next to the basic equipment the usage of one or two wireless microphones. You can choose from standard microphones, head sets and/or lapel microphones- Two microphones can be operated at the same time.

#### Further swan neck microphones for panel discussions

The digitally controlled amplifier of your ITEC MMC is already prepared for the operation of up to 3 wired microphones. All what you need for a perfect panel discussion are some additional swan neck microphones (ITEC PA7A) with a table tripod.

#### Folding table

Also a convenient accessory: The folding table can be used for notes or to place your laptop. The table can be easily mounted optionally on the left or the right handside.

**All you need is MMC, the Multimedia Cart by ITEC - you will deliver perfect presentations wherever you want: In the conference room, the seminar room, the entry hall, your manager's office, in the gym, in the classroom...**
